

Heavy Duty Hose Clamp

- Material: AISI 304 (DIN 1.4301)

- All parts are AISI 304 stainless steel, used in places that have high requirement to corrosion resistance, like outdoor hose clamping, critical auto parts connecting, top mechanical engineering, chimney etc.
- Clamp is intended for highly stressed connections, thick-walled suction hose with a metal or plastic spiral.
- Clamps have a robust construction with a clamping jaw.
- Any risk of damage to the hose is eliminated by tilted and smooth edge.

Size Diameter (mm)	Thickness X Width (mm)
17-19	0.6 x 18
20-22	
23-25	
26-28	
29-31	0.8 x 20
32-35	
36-39	
40-43	
48-51	1.0 x 22
60-63	
86-91
